

Challenges and Opportunities in Program Adaptation & Sustainability: How can theory and research inform real-world practice?

Brittany Rhoades Cooper, Ph.D.

Laura Hill, Ph.D.

Washington State University

Blueprints Conference

Denver, CO

April 13, 2016

Workshop objectives

To explore the challenges & opportunities in real-world program adaptation and sustainability of EBPs.

To network and learn from one another.

To review the research & provide tools.

To explore how to apply this to practice.

Introductions

Who is here and what can we learn from one another?

Who are we?

- Faculty from the interdisciplinary PhD in Prevention Science at WSU in Pullman

Who are you?

- Prevention practitioner
- Coalition member/coordinator
- State agency representative
- University faculty
- Evaluator
- Researcher
- EBP purveyor
- Others?

Hello
I am

*Working to improve my
community!*

Impromptu Networking

- **Goal:** Get to know your colleagues & to put the objectives of this workshop into your context.
- **The Questions:**
 - 1) What do you hope to learn at this workshop?
 - 2) What is one big program implementation and/or sustainability challenge you face?
- **The Structure:**
 - Introduce yourself to someone new, respond to the questions (2 mins per person).
 - When you hear my chime, introduce yourself to one more person and repeat.

Activity modified from Liberating Structures:

The Research

What does the latest research on program adaptation and sustainability tell us?

The Big Picture

Where are the opportunities?

Key Contextual Elements

- Funding stability
- Environmental support
- Partnerships
- Organizational capacity
- Program evaluation
- Communication
- Strategic planning

Effective EBP Implementation

- Maintain fidelity while adapting to local contexts
- Sustain implementation beyond initial seed funding by garnering needed resources

Sustained Impact

- Participants' engagement and long-term behavior change
- Program activities and infrastructure
- Community partnerships
- Organizational policies

Significant Challenges

Our Focus Today

Effective EBP Implementation

- **Fidelity and Adaption**
 - Maintain program fidelity while adapting to local contexts.
- **Sustainability**
 - Sustain program implementation beyond initial seed grant funding by garnering needed resources.

Key Points from Our Research

- **Fidelity and Adaption**

- Adaptation happens
- There are multiple dimensions to adaptations
- A relatively small number of types & reasons account for the majority (Pareto Principle)
- Global fidelity is a weak predictor of outcomes

- **Sustainability**

- There are general and program type-specific predictors
- One size does not fit all
- Organizational capacity and environmental support are key elements

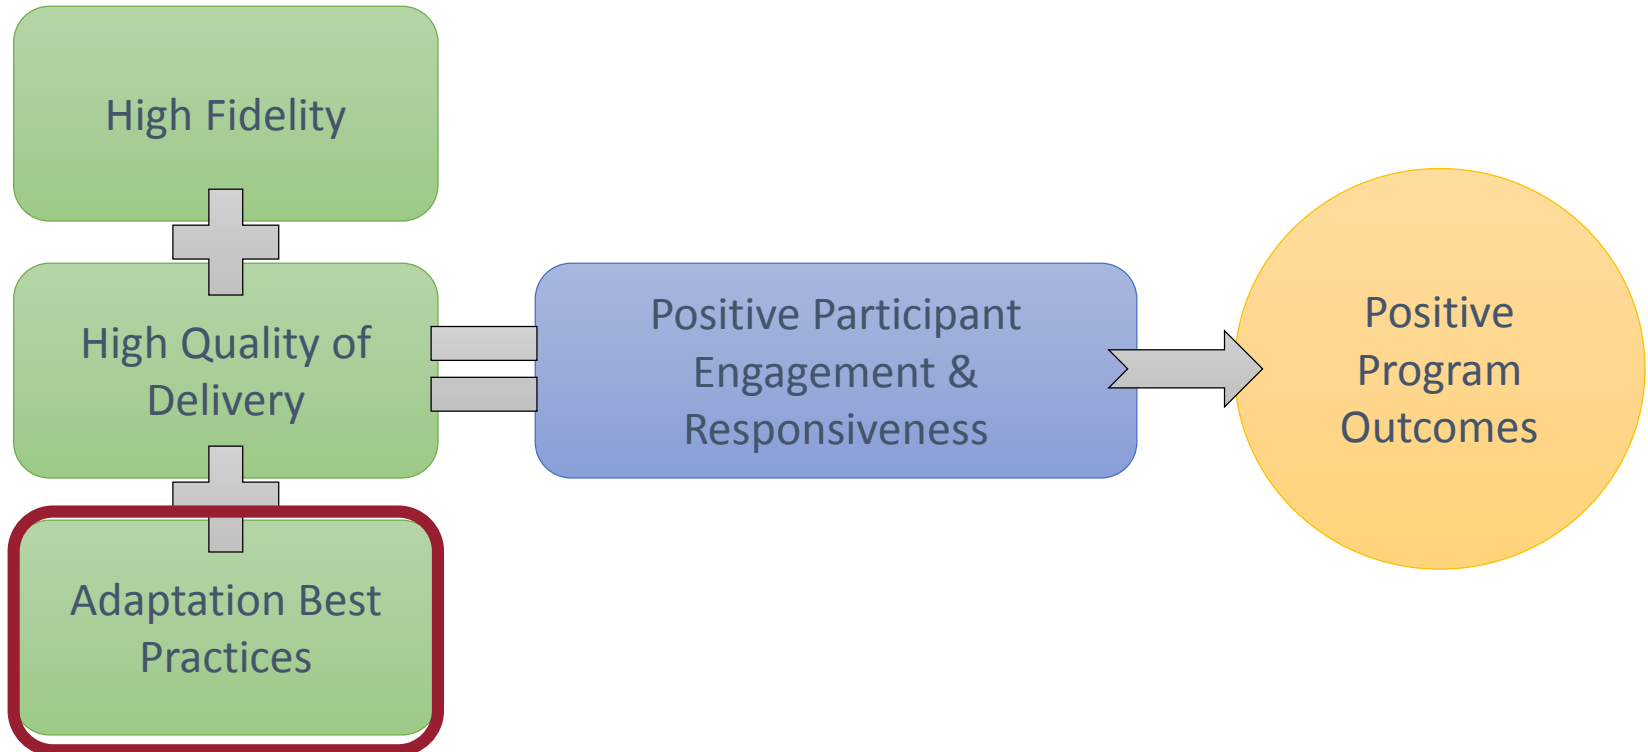

Research-based Tools

For Effective Program Implementation & Sustainability

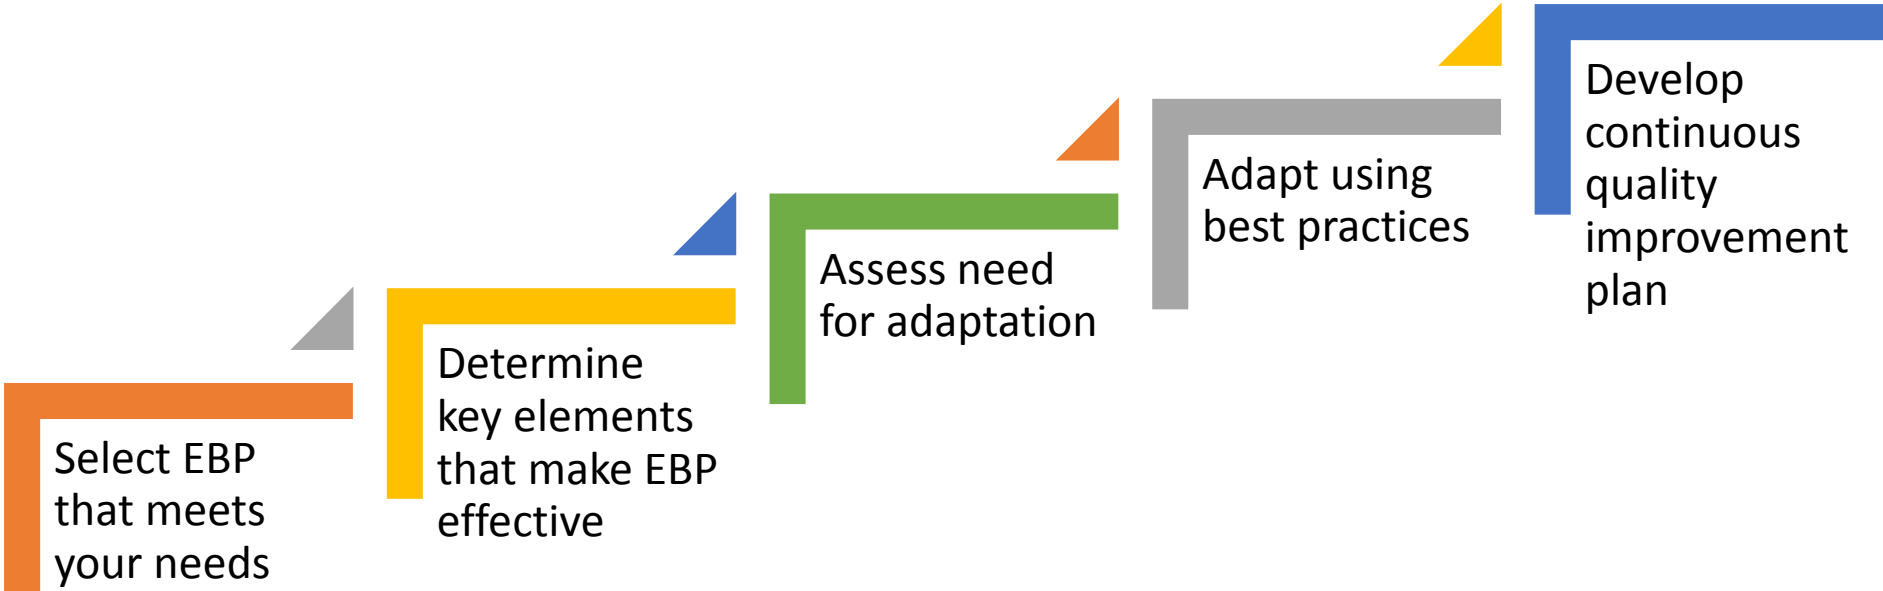

Effective Program Implementation: *Balancing Fidelity & Adaptation*

*How can I stay true to the evidence,
but still meet the needs of my community?*

Effective Program Implementation: *Balancing Fidelity & Adaptation*

A Best-Practices Guide

Select EBP
that meets
your needs

Determine
key elements
that make EBP
effective

Assess need
for adaptation

Adapt using

Effective Program Sustainability: *Assessing & Building Capacity*

<https://sustaintool.org/>

The screenshot displays the homepage of the Program Sustainability Assessment Tool. The header features a logo with icons representing various sustainability factors (e.g., environment, economy, society) and the title "Program Sustainability Assessment Tool". Navigation links include "Home", "Understand", "Assess", "Plan", and "Services". A search bar is located on the right. A prominent green button says "Assess Your Program Now!". The main content area includes a large image of hands forming a circle, a welcome message, and a "Start a new assessment" button. A red rounded rectangle highlights the four-step process at the bottom.

Assess Your Program Now!

Home Understand Assess Plan Services

Building Programs that Last - Create a group assessment, involve your team, and get different perspectives on your program's sustainability capacity. Receive a summary sustainability report.

Welcome to the online Program Sustainability Assessment Tool.

Let us help you rate the sustainability capacity of your program across a range of factors.

Start a new assessment

1 > Understand
Understand the factors that influence a program's capacity for sustainability.

2 > Assess
Use the Program Sustainability Assessment Tool to assess your program's capacity for sustainability.

3 > Review
View results from your assessment as a Sustainability Report.

4 > Plan
Develop an Action Plan to increase the likelihood of sustainability.

Program Sustainability Assessment Tool

To what extent does your program have or do the following?

PSAT Scale	Description
Environmental Support	Supportive internal and external climate for your program.
Funding Stability	Consistent financial base for your program.
Partnerships	Connections between your program and its stakeholders.
Organizational Capacity	Internal support and resources needed to effectively manage your program.
Program Evaluation	Assessing your program to inform planning and document results.
Program Adaptation	Taking actions that adapt your program to ensure ongoing impact.
Communication	Strategic communication with stakeholders and the public about your program.
Strategic Planning	Processes that guide your program's direction, goals, and strategies.

Effective Program Sustainability: *Assessing & Building Capacity*

Prepare & Assess

- Identify key stakeholders
- Complete assessment tool

Develop Action Plan

- Assemble planning team
- Review assessment results
- Prioritize areas to address
- Write action plan

Take Action

- Implement action plan
- Reassess sustainability capacity annually

Sample Sustainability Report

<https://sustaintool.org/plan>

Many factors can affect sustainability, such as financial and political climates, organizational characteristics, and elements of evaluation and communication. The Program Sustainability Assessment Tool allows stakeholders to rate their programs on the extent to which they have processes and structures in place that will increase the likelihood of sustainability. Assessment results can then be used to identify next steps in building program *capacity* for sustainability in order to position efforts for long term success.

Interpreting the Results:

The table presents the average rating for each sustainability domain based on the responses that you provided. The remainder of the document presents the ratings for indicators within each domain. There is no minimum rating that guarantees the sustainability of your program. However, lower ratings do indicate opportunities for improvement that you may want to focus on when developing a plan for sustainability.

Next Steps:

- These results can be used to guide sustainability planning for your efforts.
- Areas with lower ratings indicate that there is room for improvement.
- Address domains that are most modifiable, quicker to change, and have data available to support the needed changes.
- Develop strategies to tackle the domains that may be more difficult to modify.
- Make plans to assess the sustainability of your efforts on an ongoing basis to monitor changes as you strive for an ongoing impact.

Overall Capacity for Sustainability	3.9
Environmental Support	3.0
Funding Stability	3.6
Partnerships	5.0
Organizational Capacity	5.0
Program Evaluation	4.0
Program Adaptation	3.0
Communications	3.8
Strategic Planning	3.6

1 = to little or no extent / 7 = to a great extent

Sustainability Capacity by Domain

Sample Action Plan

<https://sustaintool.org/plan>

Sample Sustainability Action Plans

We have collected a few examples of action plans for the Environmental Support, Partnerships, and Communications domains. These come from programs operating in public health or clinical care and operating at different levels (e.g., state or community). We hope these samples can give you some direction as you write your own plan.

Environmental Support: Having a supportive internal and external climate for your program							
Sustainability Objective: Identify and cultivate 1 physician and 1 senior administrator as champions for reducing hospital readmissions by January 2015.							
Steps to achieve objectives: [Be very specific and include important sub-steps. Anyone should be able to pick up this document and understand what needs to happen in order to reach your objective.]	Who will do the work? [For every task, there needs to be a responsible party/parties. Who will ultimately ensure the work gets finished?]	What does success look like? [What metrics will you use to track progress on the completion of each step? How will you know it's time to move on to the next step?]	What non- financial resources are needed for this step? Where will they come from?	Due date [In the appropriate quarter, enter a specific date by which the activity must be completed.]			
				Q1	Q2	Q3	Q4
1. Identify 2 physicians and 2 senior administrators who are well placed to build internal support for our initiative.	Readmission team leader	4 potential champions identified Meeting with senior leadership held	None			July 31, 2014	
2. Build relationships with them and educate them about importance of our initiative. Ask them to be champions for our efforts.	Readmission team leader	1 physician and 1 administrator agree to be champions	Time				Sept 30, 2014

Application to Practice

How can this information help you address your implementation & sustainability challenges?

15% Solutions

“You cannot cross the sea merely by standing and staring at the water” ~R. Tagore

Reflect back on the implementation or sustainability challenges you identified earlier...

- **Goal:** To apply what you’ve learned today and identify actions (however small) you can do when you get home.
- **Question:** What is your 15%? What can you do (without more resources) based on what you’ve learned today?
- **Structure:**
 - 1) Make your own list of “15% solutions”
 - 2) Get in groups of 2-4 to share your list
 - 3) Group members provide consultation

Activity modified from Liberating Structures:
